Ishan Nim

Offensive Security Engineer From Another Planet | Head of
Penetration Testing & Cybersecurity @ Cyber Crew | Creator of
AlienGate |

Greater Tokyo Area

Summary

Hi, I'm Ishan Nim — a cybersecurity enthusiast with a sharp focus on offensive security, ethical hacking, and red teaming. I currently lead the Security Research and Analysis Team at Cyber Crew Inc. in Tokyo, where I dive deep into threat landscapes, vulnerability analysis, and exploit development. I'm passionate about the darker corners of the internet — from deep/dark web monitoring to payload crafting and adversary simulation. Whether it's developing custom payloads, exploring underground forums, or simulating real-world attacks in red team engagements, I thrive in environments that challenge the limits of security. I believe in learning by doing and sharing what I learn. I'm active in the infosec community and always looking to connect with others who are just as curious and relentless about cybersecurity. Let's connect — especially if you're into red teaming, payload engineering, or the fascinating depths of the dark web.

Experience

株式会社CyberCrew

Lead Security Engineer

April 2025 - Present (1 year 7 months)

〒101-0021 東京都千代田区外神田1-18-13 秋葉原ダイビル6階
